EDUCATION

Simon Fraser University, Burnaby, BC

December 2027

Bachelor of Science in Computer Science

University of Glasgow, Scotland, UK

August 2024

Field Studies in Cybercrime

British Columbia Institute of Technology, Vancouver, BC

December 2021

Diploma in Cloud Computing Systems, Completed with Distinction

TECHNICAL EXPERIENCE

Oakmont Industrial

September 2026 - Present

Software Engineer Co-op

- Defined the proof-of-concept architecture for transferring eMullion sales orders into Aquilon ERP, eliminating duplicate order entry from the target workflow.
- Validated XML and JSON sales-order imports over SFTP with the Aquilon vendor, establishing the supported integration path and XSD requirements before implementation.
- Mapped eMullion export fields to Aquilon sales-order requirements and designed a Go service for Linux, converting the vendor workflow into a testable implementation plan.

Elections Canada | Government of Canada

May 2026 - Present

Data Analyst Co-op

- Automated Tableau-to-Power BI reporting with Python by converting multi-page PDFs into normalized CSV datasets, replacing manual transcription and recovering metrics missed in earlier reports.
- Designed bilingual parsers for five dashboard sections with cross-year validation for decimals, missing fields, reporting periods, and zero-versus-null values.
- Moved repeated Power BI validation rules into reusable Denodo SQL and VQL views, enabling non-technical QA staff to filter issues and calculate issue rates without rewriting queries.

ISED | Government of Canada

January 2025 - August 2026

Site Reliability Engineer | Cloud Ops | Student Programmer Co-op

- Led production deployments for a \$100M+ patent submission platform, coordinating AWS Cloud Ops, Salesforce, Java, and database teams through scheduled maintenance windows.
- Built Java and GraphQL drift-detection tooling across 8+ environments, automating daily configuration checks and mismatch alerts through Jenkins.
- Automated repeat release tasks with Python and Selenium across Bitbucket, Bamboo, Nexus, and IBM WebSphere, standardizing CI/CD workflows for 50+ applications.
- Resolved Salesforce Lightning UI and API defects affecting bilingual patent submissions, improving reliability in a high-volume production workflow.

Impactful and Best Use of Google Gemini at Canada's largest AI hackathon and being featured in the ISED newsletter.

Executive | Mission Operations Developer | Embedded Systems Lead

- Built a React, AWS, and OpenShift spacecraft dashboard to visualize telemetry and run command workflows for ALEASAP, an ESA-supported CubeSat mission targeting a 2028 SpaceX launch.
- Migrated outreach websites from Squarespace to GitHub Pages and React, eliminating hosting costs.
-
- approximately 30 km.
-

September 2024 - December 2024

After-school Computer Instructor

-
- Introduced web development through CodePen and GitHub Pages, enabling students to design and publish their own websites.
- Adapted technical concepts into accessible, hands-on activities that encouraged experimentation, creativity, and independent

May 2024 - August 2024

- *Developed a machine learning tool using Python to remove personal information from AI models, achieving F1 greater than 80% on*
- *Identified potential security risks in AI models, such as unauthorized access to sensitive data, using Tensor Trust to demonstrate*

January 2024 - Present*Student Ambassador | Computing Science Peer Tutor*

- Delivered presentations at university recruitment events, reaching 100+ prospective students and inspiring two individuals to pursue Computer Science at SFU and join SFU SAT.
- Developed an automated system using Python and Selenium to send 200 personalized emails to schedule mentoring sessions within a day.
- Engaged students as a computing science peer tutor through exploratory discussions around introductory Python concepts.
- Collaborated with instructors to curate personalized three-hour one-on-one tutoring sessions.

CERTIFICATIONS & AWARDS

-
- Amateur Radio Operator Certificate
-
- Recognition Award from the Mayor of Richmond for Community Contributions
- Global Skills Opportunity: Equity, Diversity, and Inclusion International Mobility Award
